

Product Code . JL-ETE-7700

Coil turns (50)

Description

Coil turns (50)

Coil for Demountable Transformer Kit.

Has two front-mounted 4 mm sockets and is clearly labelled.

For connection to 230 V mains the 1000-turn Mains Coil is required.

Can be used to supplement the Demountable Transformer kit or can be used in conjunction with the U-Core from this kit and any combination of the other coils (listed below) for your particular requirements.
