## Fly Wheel Unit

### Description

---

#### Fly Wheel Unit

Shaft has an aluminium 44 mm diameter pulley for driving.

Comprising an iron fly wheel of 115 mm diameter and 1.2 kg mass in cast bracket with bearings.

All units have a base measurement of 165 x 100 mm and have 4 mm socket terminals where appropriate.

For use with a large motor/generator and a lamp unit to demonstrate the conversion of electrical energy to kinetic energy and back again.

The Malvern Energy Transfer Kit consists of a number of separately available units which enable the user to show conversions of one form of energy to another in a variety of different ways.
