Shaft Line Unit

Description

Shaft Line Unit

For showing the conversion of electrical energy to potential energy by winding up a weight on a cord.

All units have a base measurement of 165 x 100 mm and have 4 mm socket terminals where appropriate.

One end of the 6 mm steel shaft carries a 56 mm diameter aluminium 'V' pulley and the other end is fitted with a cord anchoring collar.

The Malvern Energy Transfer Kit consists of a number of separately available units which enable the user to show conversions of one form of energy to another in a variety of different ways.
