## Large Motor Generator

### Description

---

Large Motor Generator

For use as a driving unit/dynamo.

Consists of a 2 to 6 V DC motor provided with a 15 mm diameter 'V' pulley.

All units have a base measurement of 165 x 100 mm and have 4 mm socket terminals where appropriate.

The Malvern Energy Transfer Kit consists of a number of separately available units which enable the user to show conversions of one form of energy to another in a variety of different ways.
