## Moments study kit

### Description

---

#### Moments study kit

The shaped body is designed to complete the course of statics and to allow practical measurements to be undertaken.

It allows following experiments:

The kit consists of irregular shaped body, a system for measurement of distances, 4 pulleys on magnet, one roll of thread and one magnet on hook.

Determination of centre of gravity of a solid Unstable equilibrium by reference to centre of gravity  
Moment of a force, theory of moments

Study of couples Study of equilibrium of a solid under the action of several couples.
