Compact Light Source

Description

Compact Light Source

Supplied complete with an 80 cm lead with twin 4 mm plugs.

Compact light source a 12V, 100 W quartz iodine lamp in a ventilated housing.

The lamp housing is mounted on a stainless steel rod about 150 mm x 10 mm diameter.

Two adjacent sides have 19 mm diameter apertures that can be used to produce an intense 'line' source, or end-on as a powerful 'point' source.
