Ticker Tape Timer 12V

Description

Ticker Tape Timer 12V

These devices use an electromagnet which activates a striker, producing dots via a carbon disk on the ticker tape.

With 4mm terminal sockets.

The dots are produced at a rate of 50 - 60Hz depending on the mains frequency.

There are 6V and 12v units available.

The Ticker Tape Timers are used in the measurement of velocity, acceleration and general timing.
