## Forbidden Energy Gap Kit

### Description

---

#### Forbidden Energy Gap Kit

JLab manufacture, export and supply a superior range of Forbidden Energy Gap Kit in India.

The kit is self-contained and needs no additional equipment.

In Forbidden energy gap kit, the forward biased voltage of a silicon/germanium diode or LED is studied as a function of temperature.

The main unit having a digital voltmeter (0-9.99V dc) and microammeter (0-999  $\mu$ A dc), highly stabilized variable power supply (5V).

Samples (Ge, Si, LEDs).

Energy controlled hot air oven, Oil and Thermometer.
