Bourdon Gauge

Description

Bourdon Gauge

This product is for both general and laboratory use.

The read-out is by a substantial black needle on a 100 mm diameter white face.

The gauge of rugged design is mounted on a heavy metal base giving great stability.

The back of the gauge is enclosed by clear Perspex, allowing the mechanism to be viewed.

The input metal tube is is rifled and designed to fit rubber tubing of 8 mm internal diameter.
