## Telescope and Microscope Kit

### Description

---

#### Telescope and Microscope Kit

##### **Description:-**

JLab kit includes a telescope and a microscope to observe and study celestial objects and microscopic organisms.

The beginner microscope included in this kit will bring you lots of fun and excitement as you discover the microscopic world.

Two instruments for twice the fun.

This microscope is light and portable with a durable metal frame.

The Earth and Sky Telescope allows you to see the world beyond normal vision.

The 50mm objective lens transmits light for bright, clear images and focusing brings objects into view quickly and easily.

The telescope provides right-side-up images for terrestrial and celestial viewing and extends from a compact 15.5" to 17.5".

So many incredible Earth and Sky observations are now within your grasp with this telescope.

---
