

Product Code . JL-PI-813

## Mini Color Mixer JLab

### Description

---

#### Mini Color Mixer

- Teaching how the primary colors add together and are mixed can be difficult to comprehend with just diagrams.
  - This apparatus allows for visualization of the visual light spectrum and the demonstration of additive color mixing.
  - The Mini Color Mixer has 3 bright LED lamps that are on flex tubes.
  - This allows for the lamps to be pointed to a surface at almost any distance and be easily adjusted to provide clear overlap.
  - A dial for each color (red, green, blue) allows for proportional mixing of the colors.
  - Includes AC power adapter.
  - **Dimensions:**
  - **L x W:** 10 x 6.75 inch (254 mm x 171 mm)
  - **Lamp Length:** 2.14 inch (54 mm)
  - **LED Lamp Apparature:** 0.77 inch (20 mm)
  - Measurements are approximate.
-
