Hotplate Stirrer

Description:-

Hotplates Stirrers and hotplate-stirrers feature an exceptionally durable, chemical resistant white ceramic work surface.

Advanced microprocessor controls with convenient turn knobs allow quick, precise adjustment and maintenance of speed and temperature.

Their space-efficient design (8 X 9 in. footprint), makes them ideal for use on crowded benchtops and inside of bio-hoods.

The hotplate/magnetic stirrer model JLab comes complete with a support rod for mounting thermometers and temperature probes.

Safety indicator LED's on the front panel indicate when the heating and/or stirring functions have been activated.

With a square 7.5 in work surface, all three models are compatible with a wide variety of popular sizes of borosilicate glass beakers, flasks, bottles and other vessels.
