Human Skull with Cervical Spine

Description

Human Skull with Cervical Spine

Description:-

JLab life-size skull is highly detailed with representations of the fissures, processes, foramina, sutures and cervical spine, including the 7 cervical vertebrae, spinal cord, cervical nerves, vertebral arteries, basilar arteries and rear cerebral arteries.

The mandible is spring mounted to demonstrate natural movement and has three removable teeth.

Mounted on a stand.

The skull is three parts and can be disassembled into the skull cap, skull base, and mandible.
