Human Skeleton Full Size 170cm Muscles and Ligaments

Description

Human Skeleton Full Size 170cm Muscles and Ligaments

Description:-

This full-size human skeleton is a great teaching tool in any classroom.

Both the arms and legs are removable for further study.

Comes with roller base and comes with a corresponding diagram.

Bones are cast individually from naturally colored plastic with anatomical detail.

Skeleton is made exclusively of high-quality medical PVC.

All utilized in such a way to allow movement around the joint.

Skeleton includes skullcap, suture lines, and a full dentition.
