Mammal Cell Meiosis Model

Description

Mammal Cell Meiosis Model

Description:-

This 10 piece model shows the main stages of mammal cell meiosis (prophase I, metaphase I, anaphase I, telophase I, cytokinesis I, prophase II, metaphase II, telophase II, and cytokinesis II) at the enlargement of approximately 10,000X.

Model is made exclusively of high-quality medical PVC.

The 3D models are painted making the process of meiotic division easy to understand.

Models are made from high-quality medical PVC.
