

Product Code . JL-ERME-8731

Resistivity Meters Low Power

Description

Resistivity Meters Low Power

Resistivity Meters Low Power is a low power version 4Watt.

suitable for high resistivity soils of Deccan trap.

It gives a depth penetration of about 100 meters.

Applications of Earth Resistivity Meter:-

Ground Water Exploration

Bed Rock Studies

Mining

Pipe line surveys

Civil Engineering

Environmental studies

Geological and geo-technical mapping

Agriculture engineering
