#### Digital Double Door Drying Oven

##### Description:-

The larger soil drying ovens are constructed with mild steel and powder coated exterior and Stainless Steel coated chamber which is both durable and corrosion resistant.

All Sizes of Oven are fitted with a (PID Controller) having a microprocessor digital control as standard.

All units come with MCB tripping device in cases of any short circuit, overloading of voltage and Low voltage cut off.

Wiring of heaters can be connected / dis-connected removing the side panels of the Oven.

Caster wheels with locking arrangement are fitted below the Oven for easy movability of the unit from one place to another. Door locking arrangement is very easy & convenient with the lever to lock & unlock with half turn lever.

A Safety Thermostat is fitted inside the Oven for safety purpose.

In case of the failure of the PID controller the safety thermostat will serve as the temperature controller.

A High/Low switch is fitted on the panel of the Oven for Heaters.

This feature allows heaters to burn all together or half of them.

---

The Least Count Division for viewing/setting the Temperature is  $0.1^{\circ}\text{C}$ .
