## Centrifugal Pump

### Description

---

Feature:-

High efficiency and high discharge rate at less power consumption.

Casing and Impeller are made of C.I. casting grade FG 200 by shell core molding process for required strength with the smooth finish of internal vanes for better hydraulic performance.

Anti Corrosive stainless steel shaft.

The impeller is dynamically balanced for low noise and longer bearing life.

Long life due to replaceable wearing parts.

Easy spares availability.

Suction lift up to 8 meters.

The 'Back Pull Out' design enables the pumps to service without disturbing the pipelines.

Available in various pipe sizes.

Extremely simple in construction, Easy maintenance and Easy gland packing replacement.

Sealing arrangement with gland packing is standard supply, mechanical seal arrangement available on request.
