Organic Impurities Test Set

Description

Organic Impurities Test Set

Description:-

The Organic Impurities Test is a widely used, simple procedure to determine the presence of organic compounds in fine aggregates.

JLab offers a complete Organic Impurities Test Set with or without sodium hydroxide reagent or individual set components for your convenience.

Samples are shaken in a special graduated bottle with a 3% sodium hydroxide solution then allowed to stand for 24 hours.

If the resulting color of the liquid above the test sample is darker than a reference chart standard color, organic compounds may be present and further testing should be done.

The Test Bottles are graduated in oz and ml and have watertight screw-on caps.

Feature:-

Sodium hydroxide pellets supply enough 3% solution for over 150 tests.

Upgraded five-color Color Reference Chart meets latest revisions.

Sodium Hydroxide Pellets in reagent grade can be ordered to ensure compliance.
