Advanced Electro Pneumatic Trainer

Description

Advanced Electro Pneumatic Trainer

The Advanced Customized Electro-Pneumatic Trainer outlines the principle of Pneumatic control used in industrial applications.

It explains components of pneumatic control system and their applications.

Features:-

Compact Ergonomic Design.

Relay board logic circuit operation.

User Friendly, Self Explanatory Systems.

Enhanced Electrical Safety Considerations.

Inbuilt Safety Measures to avoid improper usage.

Training Manuals mimic Charts for Operation Ease.

Leak proof Safety Measures, sturdy piping & Robust Construction.

M.S. powder coated cubical plant with standard Instrument Assemblies.
