## Laboratory Pasteuriser

### Description

---

Laboratory Pasteuriser

#### **Description:-**

The Laboratory Pasteuriser is a benchtop unit designed to provide practical training for the operation of a large modern pasteurizing plant.

The unit may also be used for project work, in particular, to measure the effects on product quality of different process conditions.

#### **Features:-**

Miniature plate heat exchanger

Choice of holding tubes

Control console incorporating comprehensive instrumentation.

Variable product temperature and holding time

Fully self-contained design with integral hot water system

---

**Benefits:-**

Tests can be carried out quickly and easily

Benchtop operation

Simulates the conditions used in a production plant

Small quantities of liquid product can be processed

**Applications:-**

Arresting of yeast activity

Quality control

Destruction of spoilage organisms

Arresting of enzyme activity

HTST pasteurization of milk Destruction of spoilage organisms
