Binocular and Trinocular Head

Description

Binocular and Trinocular Head

- Fully coated optical system provides sharp and clear images with extremely good flatness and contrast.
 - The images are brighter and more distinct even as the periphery of the field of view.
 - With their large zoom range and long-working distance, these are ideal for high-magnification, high-resolution observation in biological research, precision-oriented semi-conductor and other industries 45 inclined, 360 rotatable binocular head or trinocular head.
-
