

Product Code . JL-TWL-9192

Acceleration Sensor

Description

Acceleration Sensor

Description:-

The Acceleration Sensor, offered by us is procured from the reputed manufacturers having years of experience in the domain.

Developed from components, our Acceleration Sensor offers high performance in every use.

Applications in Wind farms, Offshore wind farms.

We have reputed Merchant of Acceleration Sensors that are widely appreciated in the national market for its sophisticated design and technically advanced features.

Specification:-

Type: Single axis, Dual-axis, and Triple axis

Frequency: 0-50 Hz

Operating voltage: 7-24 VDC

Range : +/- 2 g

Operating temperature : -40 degree C to + 85 degree C

Outputs : Voltage 0.5 to 4.5 VDC or Current 4-20mA
