

Product Code . JL-TWL-9201

Light Sensor

Description

Light Sensor

Description:-

The Light Sensor approximates the human eye in spectral response.

Light Sensor uses it for inverse square law experiments or for studying polarizers, reflectivity, or solar energy.

Specification:-

Resolution:

0-600 lux: 0.2 lux

0-6000 lux: 2 lux

0-150000 lux: 50 lux
