

**Product Code . JL-MI-9589**

## Logger Sensor

### Description

---

#### Logger Sensor

Plug and play technology allows for an intuitive and easy-to-use data logging platform.

Just plug the appropriate logger sensor(s) into the module and begin your experiment.

No calibration or setup time required.

Use up to 10 sensors per experiment.

Sensors convert the measured parameters into a processed value (°C, °F, Lux, dB, mA, V, etc.).

Each sensor stores up to five experiments in flash memory.

When you are ready, send the data in digital form to your computer or smart device.

Sensors accommodate experiments lasting up to 31 days.

Module software includes online and offline modes, tables, graphs, data analysis, double axis setup, statistic operations and mathematical operations.
