Two-Way Microscope

Description

Two-Way Microscope

When a three-dimensional object (insect, leaf part, flower part, or other living or nonliving object) is placed on the stage, a magnified image can be seen, both top and bottom view.

Students will readily see dimensional views of specimen.

The top objective lens can be used to view large items not able to fit on the stage.

2X magnification and color may vary.

4 L x 2-1/2 W x 5-1/2 H. Grades 1-6.
