## Field Trip Microscope

### Description

---

#### Field Trip Microscope

Large 8.5 mm field of view with 55 mm working distance and large depth of focus excellent for studying insects, pond water, rocks and plants 20X magnification.

• Specially designed optical system provides crisp, detailed images that are erect and normal - views that make specimen movement easy.

• Rugged, all-metal, inclined microscope with slip clutch rack and pinion focusing allows quick viewing of opaque three-dimensional specimens.

• 6-1/2 high with 4-1/2 x 3-3/4 base.

• Unique light gathering optical system needs no extra light - ideal for both classroom and field trip use.

• Convenient carrying case.
