Polydron Geometry Piece

Description

Polydron Geometry Piece

Through the “windows” students can investigate shapes and angles, edges and vertices.

An excellent tool for more advanced students.

Components provide an opportunity to look beyond construction to the underlying principles involved in math and technology.

Provides exciting hands-on learning and encourages students to communicate their ideas and discoveries using the figures as demonstration aids.

Includes 48 equilateral triangles, 24 squares, 24 right angle triangles, 12 isosceles triangles, 12 pentagons, 6 rectangles, 6 large equilateral triangles and 6 hexagons.
