Algebraic Tiles

Description

Algebraic Tiles

Get the whole class involved in algebraic concepts with EduStic's innovative algebraic tile classroom set.

Students will be able to visualize polynomials and trinomials and learn to factor quadratics easily with these static-cling tiles.

EduStic's algebraic tiles stick to glossy surfaces such as whiteboards, windows and laminated paper.

Because of this feature, teachers can check for understanding at a glance.

And, unlike hard plastic tiles, these will never get lost because they can be stored on laminated paper.

Tiles measure 4-1/2 in. x 6-1/4 in.

Includes 160 x 2 tiles, 240 x tiles, and 400 units.
