Math Center Kit

Description

Math Center Kit

This kit gives students the opportunity to work independently while learning interactively.

Self-correcting Learning Palettes are easy to use, fun and classroom tested.

Works with all curriculums and allows students to work at their own pace.

Kit comes with two Learning Palette Bases and six curriculum packs.

Each curriculum has been carefully written to meet NCTM Standards and the new Common Core standards.

This grade level kit includes three packets for numeration and one each for algebra concepts, geometry and measurement and probability and statistics.

Kit was designed for math centers and allow 4-6 students to work independently.

Additional bases will allow for more students.

Each packet includes 12 cards with 12 questions on each card for a total of 864 questions.
