Electronic Teaching Tool

Description

Electronic Teaching Tool

A jumbo, powerful timer designed just for teachers!

The versatile and patent-pending design packs a variety of teaching tools into a single digital timer.

The LCD display with blue backlight is so big and bright, you can read the display from the back of your classroom.

Push the student selector button or team selector button to randomly pick any student or team to share an answer or begin a game.

Features a random mode that will generate random numbers for math problems and games.

Also includes alarm, countdown timer, stopwatch function for timed activities and a function to check classroom temperature.

When it's not in use, the timer displays the time and date.

Can be hung on a wall or use the stand to place it on a desk.

Measures 6-1/2 in. x 9-1/2 in. Requires six "AA" batteries (not included).
