Archimedean Solids Class Set

Description

Archimedean Solids Class Set

Geometry, space, and creativity come to life with this Polydron Frameworks set.

Construct more complex shapes that allow the building and exploration of the 13 solids, famously attributed to Archimedes.

Includes 200 equilateral triangles, 108 squares, 48 pentagons, 60 hexagons, 12 octagons, 24 decagons and 16 work cards.

This set also includes an information book showing construction with a detailed explanation of each solid.

Allows all 13 of the solids to be constructed simultaneously.
