## Plastic Geometry Moveable Axes

### Description

---

#### Plastic Geometry Moveable Axes

Help students and their minds travel out of the two-dimensional world of flat planes with this set of 10 plastic geometric shapes.

Movable axis threads are fixed to the closed top and hang down through the open bottom of each shape.

Helps illustrate the diameter, altitude, and the slant height lines of three-dimensional solids, which are important concepts in the study of volume and surface area.

Includes 1 each of cube, prism, square pyramid, triangular prism, triangular pyramid, octagonal prism, octagonal pyramid, cylinder, cone and sphere.

Shapes measure 5-7/8 H.
