Floating Magnetic Match Rings with Cards

Description

Floating Magnetic Match Rings with Cards

- Magnetic Match Rings is the fun way to learn about magnetism, help develop visual matching skills, and improve eye-hand coordination.
 - Each ring is magnetic, one side positive and the other negative.
 - When you stack the rings, they either attract the next ring (snap together), or repel the next ring (push apart or cause it to float), creating a space in the stack.
 - **To Play:** Select one of the 50 pattern matching challenges and stack the magnetic rings in the exact same color order as shown on the card.
 - If a card shows rings that are floating (not touching), your rings must also be floating.
 - Have fun matching!
