Fraction Formula Game

Description

Fraction Formula Game

Draw a card and find the corresponding fizzy fraction tile.

Drop the tile into your cylinder.

“Hold” if you think you’re as close to 1 as you’ll get without going over, or draw another card if you think you can get closer by adding another fraction tile.

The player who gets closest to 1 wins the round.

Includes 4 tubes, 52 fraction cards, 52 fraction tiles, 20 scoring cards and teacher guide.
