Geometric Tessellation Set

Description

Geometric Tessellation Set

A wonderful way to introduce early geometry shapes and their relationship to each other to students.

They will have opportunities to improve visual and motor coordination while gaining experience in problem solving and recognizing and matching colors and shapes.

Each card indicates the needed pieces, then has a shape.

Students use the indicated pieces to build the shape directly on top of the drawn shape on the card.

Set includes 30 cards (6 each at 5 different skill levels) and teacher's notes.

Includes 100 pieces in 5 different geometric shapes and 2 colors.
