

Product Code . JL-PLE-9896

Large Electrolytic Capacitors

Description

Large Electrolytic Capacitors

Used in energy conversion experiments to show how energy is stored in a capacitor to demonstrate that energy stored is proportional to v^2 .

Mounted in clips on rectangular base and provided with 4 mm socket connections.

Capacitance:- 25 x 103.

Dimensions:- 165 x 100 x 80 mm.
