Diesel Engine Management Systems Panel Trainer

Description

Diesel Engine Management Systems Panel Trainer

This trainer provides students and instructors with the opportunity to demonstrate, investigate and fault-find a simulation of typical diesel engine management systems.

The trainer is designed to allow access to a variety of test points for vehicle electrical components, as well as provide an understanding of the overall system layout and configuration.

To facilitate the development of techniques in diagnostics and fault-finding skills, the panel includes a range of faultinsertion options to simulate typical real-world system malfunctions.

Typical practical tasks include:-

Electronic control module

Engine protection

Engine exhaust emissions

Engine management analog sensors

Engine management digital sensors and switches

Engine management active sensors

Cruise control

Engine management actuators
